## CERTIFICATE OF ANALYSIS & DECLARATION

To Whom It May Concern

This is to certify:

- \* That nanosilver solution is a very low concentration (10 ppm) suspension of nano-meter size silver atoms/ions in deionised water. As such in proper packaging, it can be freely transported as natural water without risk to any type of carriers;
- \* That our nanosilver solution is manufactured by our company with the following ingredients and specifications:-

Ingredients: Nanosilver atoms/ions and deionised water.

### Specifications

Appearance : Clear water solution.  
Smell : None.  
Colour : Clear and colourless  
Density : 1.0 gm/ml  
Total solid matter : 10 part per million (ppm) nanoised silver atomic size less than 10 nanometer (nm)  
Total water content : 100%  
pH of solution : 7.0±0.2  
Shelf life : More than 3 years

- \* That our nanosilver particles are derived from pure silver bar (99.9999%) and our water has been multifiltered and deionised from the main supplied by the local authority.
